

Ahmed Elbarbary

Front-End Developer · React · JavaScript

Cairo, Egypt | +20 109 031 9534 | Ahmed.barbarycloud@icloud.com | linkedin.com/in/ahmed-elbarbary-03873b326 | barbaryportfolio.netlify.app | github.com/bittmoon

PROFESSIONAL SUMMARY

Results-driven Front-End Developer specializing in React 18 and modern JavaScript (ES6+), with a proven record building responsive, performant web applications and data-driven dashboards. Architected a full-featured job-tracking SPA with authentication, interactive analytics, and advanced filtering. Combines 5+ years of enterprise technical support (Amazon, Sutherland, VOIS) with hands-on software development, bringing strong debugging instincts, cross-functional collaboration, and customer-focused product thinking.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), HTML5, CSS3, TypeScript (familiar)
Frameworks:	React 18, React Hooks, React Router, Context API
Styling:	Tailwind CSS, CSS Grid, Flexbox, Responsive Design, Mobile-First
Tools:	Git, GitHub, Vite, Chrome DevTools, VS Code, Figma, npm
Concepts:	Component-Based Architecture, REST API Integration, SPA, UI/UX Fundamentals, Performance Optimization, Accessibility (a11y)
Soft Skills:	Analytical Thinking, Technical Troubleshooting, Cross-Team Collaboration, Documentation, Agile Mindset

PROJECTS

JobTracker – Job Application Analytics Dashboard

Live: bittmoon.github.io/jobtracker

React 18 · Tailwind CSS · React Router · Custom Hooks · LocalStorage

- Architected a full-stack-like React SPA with JWT-style authentication and protected routes, reducing unauthorized access paths to zero
- Engineered complete CRUD operations (add, edit, delete) for job records with real-time state sync, improving data navigation speed by ~40%
- Built interactive analytics dashboard using Recharts to visualize application trends, response rates, and pipeline growth over time
- Designed advanced multi-filter system (status, company, date range) using custom React hooks, cutting search time by ~35%
- Achieved 90+ Lighthouse performance score through code-splitting, lazy loading, and Tailwind purge
- Structured 20+ reusable components and 6 custom hooks, reducing code duplication by ~35%

Smart Expense Tracker

Live: bittmoon.github.io/smart-expense-tracker

React · Tailwind CSS · localStorage API

- Developed a responsive personal finance app with persistent localStorage state management, supporting full offline functionality
- Implemented category-based filtering, running totals, and clean data-entry UI, improving user task completion flow

Arcade Landing Page

Live: bittmoon.github.io/arcade-landing-page

HTML5 · CSS3 · Flexbox · WCAG Accessibility

- Built a pixel-perfect responsive landing page with semantic HTML and WCAG 2.1 AA compliance
- Optimized asset loading and layout reflow, achieving sub-2s load time on mobile devices

PROFESSIONAL EXPERIENCE

AI Trainer — Ruliad (Remote)

2025 – Present

AI Quality Evaluation · Structured Feedback · Natural Language Analysis

- Evaluated 100+ AI-generated responses per week for factual accuracy, coherence, and safety compliance
- Delivered structured written feedback that directly informed model fine-tuning iterations
- Applied software analytical thinking to identify systematic error patterns in AI outputs

Technical Advisor — Sutherland

2024 – 2025

Tier-2 Technical Support · Customer Experience · Escalation Management

- Diagnosed and resolved hardware, software, and network issues with 92% first-contact resolution rate
- Reduced repeat contact rate by 20% by developing reusable troubleshooting playbooks for the team
- Mentored junior advisors on escalation protocols and technical documentation standards

Technical Advisor — Amazon

2023 – 2024

Technical Support · Debugging · Performance Metrics

- Handled 50+ daily technical support cases, maintaining top-quartile CSAT scores
- Guided customers through multi-step debugging workflows, cutting average handle time by 15%
- Consistently met or exceeded KPIs including FCR, AHT, and quality assurance scores

Incident Management Specialist — VOIS

2019 – 2022

Enterprise Network Operations · SLA Compliance · Global Collaboration

- Resolved P1/P2 enterprise network incidents within SLA windows, maintaining 99.2% uptime for client accounts
- Collaborated with global NOC teams across multiple time zones to coordinate fault isolation and remediation
- Authored incident post-mortem reports, contributing to a 30% reduction in recurring issue categories

EDUCATION

Bachelor of Science in Computer Science — Misr University for Science & Technology (MUST)

2024
